### ABOUT THIS REPORT

The data presented here are drawn from the Global Terrorism Database (GTD). The GTD contains information on more than 150,000 terrorist attacks that have occurred around the world since 1970. For more information about the GTD, visit [www.start.umd.edu/gtd](http://www.start.umd.edu/gtd). The GTD is a project of the National Consortium for the Study of Terrorism and Responses to Terrorism (START). START aims to provide timely guidance on how to reduce the incidence of terrorism and disrupt terrorism networks, as well as enhance the resilience of society in the face of terrorist threats at home and abroad.

The authors of this Fact Sheet are START's Dr. Erin Miller and Dr. Michael Jensen. For questions about this report, contact [infostart@start.umd.edu](mailto:infostart@start.umd.edu).

The National Consortium for the Study of Terrorism and Responses to Terrorism (START) is supported in part by the U.S. Department of Homeland Security Science and Technology Directorate's Office of University Programs through a Center of Excellence program led by the University of Maryland. START uses state-of-the-art theories, methods and data from the social and behavioral sciences to improve understanding of the origins, dynamics and social and psychological impacts of terrorism. For more information, contact START at [infostart@start.umd.edu](mailto:infostart@start.umd.edu) or visit [www.start.umd.edu](http://www.start.umd.edu). This research was supported by the Science and Technology Directorate of the U.S. Department of Homeland Security through awards made to the START and the first author.
